· · · · · · · · · · · · · · · · · · ·		
Riement	Property Label	
	rioper (y	

Basic label editing steps:

- 1) Click the item that you needed in label items area.
- 2) Click the mouse; hold it and drag a box on the label, and then you can see the item will be displayed on the label.
- 3) Make the item in selected state.
- 4) Use your mouse to get close to the border, when the mouse became the icon like below image A, B or C, means you can adjust the width or length. If the mouse became the icon like image C, means you can adjust the whole border. If the mouse became the icon like image D, means you can move the item to any position.

For example:

Image C

Use your mouse get close to the boarder till the mouse became the icon, and then click the mouse, hold it and drag the mouse till you get satisfied.

Image B

Use your mouse get close to the boarder till the mouse became the icon, and then click the mouse, hold it and drag the mouse till you get satisfied of the length.

Image D

Use your mouse get close to the boarder till the mouse became the icon, and then click the mouse, hold it and drag the mouse to move the item.

5.3. How to modify label

Modify a whole label

Click any blank position on the label, and then you can modify the whole label via the right column.

≝) Z + 🕮	
Misc	
Version	New scale(M3)
Rotate	O degree
Option	Design mode
Grid line	No
Guides	No
Pager orie	Top(†)

•	Version:	Click it to	choose	scale M3	version	or old	version
---	----------	-------------	--------	----------	---------	--------	---------

- Rotate: To choose you rotate degree of your label
- Option: to choose option mode
- Grid Line: Click it to choose whether have grid line or not.
- Guides: Click it to choose whether have guides or not.

Modify a Single Item

If you want to modify the related item on the label, you should click it firstly to make it in selected status, and then you can modify it by the below area.

For example, when you need to modify you production date label,

1	Date separ	
	Date forma	DDMMYY
	Line width	1
	Print	Yes
	Height	45
	Width	163
	X Position	64
	Y Position	79
	Font type	FONT (16x32)
	Align left	Align left
	Align vert	Align Center
	Boader	Default
	Shape	Rectangle
	Element na	Production Date
	FontPropRe	Normal
	Rotate	0 degree
	Month form	Number

- Date separate : click it to choose the date separate symbol
- Date format: to choose date format
- Line width: to choose boarder line width
- Print: True means this item will be printed out. False means this item will be not printed out.
- Height and Width: input the number directly to adjust the border size.
- X and Y: the coordinate of the item. You can input the number directly to move the item.
- Font type :to choose font type
- Align left and align vertical: to adjust label align direction
- Boarder: to choose boarder
- Shape: click it to choose the shape of label
- FontPropRe: to choose font prop reverse
- Rotate: to adjust rotate degree

Eg:

If you want to make labels like below picture

Note:

- 1) when you making custom label, please refer to the default label template, so as to avoid shortening the lifetime of printer head.
- 2) If there are label templates on PC, you can click the icon **^** on the toolbar to upload the label to the software, and then click the "Display" on the function manual to choose label template.

Apple01 PLU name of "Text"	 Press "Text"PLU Name1 Click the mouse; hold it and drag a box on the label, and then you can see this item will be displayed on the label. click the box and edit information on right side box, for example "font type, align .and so on "
Barcode of section "barcode"	 1 Press "barcode"barcode1 2 Click the mouse; hold it and drag a box on the label, and then you can see this item will be displayed on the label. 3 click the box and edit information on right side box, for example "barcode type, width, height and so on "
Total price Total price of section "Price"	 1 Press 'Price'—Total price 2 Click the mouse; hold it and drag a box on the label, and then you can see this item will be displayed on the label. 3 click the box and edit information on right side box, for example "font, width, height and so on ".
99999999999/kg Price section	 Press "Price"Price Click the mouse; hold it and drag a box on the label, and then you can see this item will be displayed on the label. click the box and edit information on right side box, for example "font, width, height and so on ".
ACLAS Image	 Press "image"image choose the picture you want to insert when a message box pops out. click the box and edit information on right side box, for example "width, height and so on ".
Welcome to use Aclas barcode label scale Other Text http://www.aclas.com	 Press "Other text"other Click the mouse; hold it and drag a box on the label, and then you can see this item will be displayed on the label. click the box and edit information on right side box, for example "name, shape, width, height and so on ".

5.4. Alignment Function

Left justify: Select two or more than two items, then use mouse to click this icon, the items you selected will be left justifying.
Top justify: Select two or more than two items, then use mouse to click this icon, the items you selected will be top justifying.
Right justify: Select two or more than two items, then use mouse to click this icon, the items you selected will be right justifying.
Bottom justify: Select two or more than two items, then use mouse to click this icon, the items you selected will be bottom justifying.

5.5. Spacing setting

~

Same spacing in horizontal: Select items and click this button, the space between these items is the same.

Same spacing in vertical: Select items and click this button, the space between these items is the same.

18

Same height: Select items and click this button, the height of all the items is the same with the first one selected.

Same width: Select items and click this button, the width of all the items is the same with the first one selected.

5.6. Zoom in & Zoom out

Zoom in: Click the item that you need to zoom in and make it in selected state, click this zoom in icon.

Zoom out: Click the item that you need to zoom out and make it in selected state, click this zoom out icon.

7 PLU Information

Double click the program to enter the main interface. Click "File"---"PLU Information" to enter into the PLU interface. You can edit PLU information here.

6.1. PLU Edition

You can click icon "Add" + on the toolbar to edit PLU information, and click "Save" icon 🖌 to save

the operation;

If there are PLU information that has been already edited on PC, you can import it to Link65 program and export to scale. Click "Tool"---"Import Data"---"PLU information", and then choose the PLU document on the pop window, then click "Open" to execute. After importing PLU, click "Complete" to close the

Hotkey Installation

Note: Please refer to "PC software management/Hotkey" in attached CD.

Cut the hotkey sheet down and insert the hotkey sheet into the keyboard. Please take below pictures for your references:

8 Synchronous Data

Note: "Synchronous Data" means "upload data from scale to PC" or "download data from PC to scale". Before synchronous data between scale and PC, please make sure the communication is OK!

9 Import/Export Data

Import data: import data from PC to Link65 program, so as to synchronous to scale.

Export data: export data from link65 program to PC to save the data on PC.

Method: click import data or export data, the choose data from PLU information, department, hotkey and so on the pop-up window, then choose the data location on the pop-up window, and click "Complete" after operation.

13 Package Type

12.1. Fixed Weight Mode

This function is available by presetting on PC software first.

For example: pack apple by the fixed weight 0.25kg, and the corresponding hotkey is 50023.

The operation processes are as follows:

Open AclasActiveSync_PC" Open AclasActiveSync_PC" on your PC. Click "File"---"PLU information", choose the column apple, and then click the edit icon on the toolbar. Choose 'Fixed weight Mode' in the column 'Package Type'; input 250g in the column 'Package Weight'; input 5% in the column 'Package range'.

Click the save icon \checkmark on the tool bar to save the settings. Then click "Sync Data" Sync Data to download the setting data to scale.

12.2. Fixed Price Mode

This function is available by presetting on PC software first.

For example: pack apple by the fixed price 1kg, its unit price is 10 Y/kg, and the corresponding hotkey is 50023.

The operation processes are as follows:

Open AclasActiveSync_PC" Open AclasActiveSync_PC" on your PC. Click "File"---"PLU information", choose the column apple, and then click the edit icon on the toolbar. Choose 'Fixed Price Mode' in the column 'Package Type'; input 1000g in the column 'Package Weight'; input 10 in the column "Package Price";

input 5% in the column 'Package range'. Click the save icon 🔽 on the tool bar to save the settings.

Then click "Sync Data" Sync Data to download the setting data to scale. When selling, the total price is the unit price preset.

12.3. Fixed Weight and Price Mode (Gift Basket)

This function is for selling gift basket, in which there are many kinds of items. This function can be used by pressing "Gift Basket" on scale, you can also preset on PC.

The operation processes are as follows:

Open AclasActiveSync_PC" Open AclasActiveSync_PC" on your PC. Click "File"---"PLU information", choose the column apple (one of the items on the basket) as the "gift basket" hotkey. And then click the edit icon on the toolbar. And input name 2 "Gift Basket"; input "0" in the column 'Unit Price'; choose 'Fixed Weight and Price Mode' in the column 'Package Type'; input "0" in "Tare Value" column. Click the save

icon \checkmark on the tool bar to save the settings. Then click "Sync Data" Sync Data to download the setting data to scale.

Note: when using "Gift basket" function, "Tare value" can be set "0.000" or "0.001" for label printing mode. "0.001" means each item in the basket can be printed a label when weighting, and a sum label in the end; "0.000" means there is only a sum label in the end (there is no individual label during weighting).
